Ontario, Canada

INTRODUCTION

- Over 4 years of industry experience as a Full-Stack Software Engineer, specializing in building and maintaining enterprise applications.
- Skilled in Angular, React, and React Native, with a focus on creating responsive and user-friendly interfaces.
- Proficient in Spring Boot (Java), ASP.NET (C), and Django (Python), with hands-on experience in developing scalable, high-performance applications.
- Experienced in stream processing using tools like Apache Kafka and Apache Spark, enhancing data accessibility and analytics capabilities.
- Strong problem-solving and communication skills, excelling in cross-functional teams and Agile environments to meet dynamic project goals.

SKILLS

- **Programming Languages:** Java (8/11/17), C#, C++, Python, JavaScript, TypeScript, HTML5, CSS
- **Frameworks and Libraries:** Spring Boot, Angular, React, React Native, ASP.NET, Django, Node.js, Flutter, Bootstrap
- **Database Systems:** MySQL, Oracle, PostgreSQL, MongoDB
- **Tools:** Git, Jira Jenkins, Docker, Kibana, Apache Kafka, Apache Spark, Confluence
- **Soft Skills:** Time Management, Leadership, Critical thinking and problem-solving, Planning and Coordination, Communication and Collaboration, Conflict Resolution

EXPERIENCE

- **Softab Technologies** Aug 2023 - Dec 2023
Software Engineer Consultant Windsor, Canada
 - Spearheaded the development of a management portal, utilizing Angular for a responsive frontend and Java Spring Boot for a robust backend, enhancing user experience and efficiency.
 - Built a reliable data infrastructure using MySQL, ensuring efficient data storage, retrieval, and integrity across the project lifecycle.
 - Actively collaborated with stakeholders to incorporate feedback, adapt features, and align project goals, contributing to successful Agile sprints and on-time delivery.
- **Tenerity India Limited** Jul 2020 - Apr 2023
Software Engineer Pune, India
 - Managed and optimized a banking client's travel benefits website, maintaining, updating, and implementing new features to improve functionality and user engagement.
 - Developed RESTful APIs in ASP.NET and Angular, re-engineering code to meet accessibility standards and enhance the website's usability.
 - Conducted code reviews on GitHub, working collaboratively with cross-functional teams and participating in all Agile project stages, using Jira and Confluence to track progress and meet deadlines.
 - Designed a high-volume data processing solution with Apache Spark, enabling the transformation and integration of millions of data records into databases, Kafka, and other microservices.
- **Tenerity India Limited** Jul 2019 - Jun 2020
Software Developer Intern Pune, India
 - Developed an "Inventory Management System" to track and manage stock for employees, showcasing strong project management and agile methodologies.
 - Contributed to major frontend features using Angular, integrating these with ASP.NET Core APIs for a smooth and efficient user experience.
 - Worked closely with QA testers, team leads, and developers to ensure quality, efficiency, and timely completion of project deliverables.

EDUCATION

- **University of Windsor** May 2023 - Aug 2024
Master of Applied Computing Windsor, Canada
- **Chitkara University** Jul 2016 - Jun 2020
Bachelor of Engineering in Computer Science Punjab, India

PROJECTS

- **Climate Neutral - EcoCoders**

Jan 2024 - Apr 2024

Tools: [HTML, CSS, JavaScript]

- Led a collaborative team in the development of a cutting-edge web application focused on revolutionizing vehicle emissions management and reduction
- Oversaw implementation of key features including emissions calculation, data visualization, and strategic planning
- Provided guidance and support to team members, leveraging expertise in HTML, CSS, and JavaScript for hands-on contribution to development
- Received an award for project's potential impact in mitigating carbon emissions, highlighting leadership and technical skills in driving solutions for recognition environmental sustainability

- **TiffinBox**

Jan 2024 - Apr 2024

Tools: [Python Django]

- Spearheaded development of TiffinBox, focusing on backend and frontend functionalities
- Implemented robust backend features using Python Django, ensuring seamless user experience and efficient order management
- Integrated databases with Django's ORM, optimizing data storage and retrieval for enhanced performance
- Designed and developed RESTful APIs with Django REST Framework, facilitating smooth communication between frontend and backend components

- **Nuestro**

Sep 2023 - Dec 2023

Tools: [Java Spring Boot, Angular, MySQL, PostgreSQL, MongoDB, MSSQL]

- Led the development of Nuestro, a client-side database project aimed at promoting data ownership and decentralization, challenging traditional centralized database models.
- Expanded project capabilities by integrating MySQL, MSSQL, and MongoDB, and designed a systematic approach to enhance user control over data while ensuring data security and integrity.
- Simplified user interaction with a streamlined configuration process for database connections, implementing audit logs to ensure data consistency and enable efficient tracking.
- Demonstrated full-stack expertise by developing the frontend in Angular and building APIs in Java Spring Boot, creating a seamless and user-friendly application experience.
